**iPad view**

![iPad view of Teamcenter AppShare login page](image1.png)

- **Server**
  
  Enter the server name, for example, `appshare.companyname.com`. Or, you can choose one of the servers you have previously logged into.

- **User Name**
  
  Enter your user name.

- **Password**
  
  Enter the password for accessing AppShare.

  **NOTE:** If you select `Remember Password` to securely store your password, you do not have to enter your password in future AppShare sessions.

**iPod/iPhone view**

![iPod/iPhone view of Teamcenter AppShare login page](image2.png)

- **Server**
  
  Enter the server name, for example, `appshare.companyname.com`. Or, you can choose one of the servers you have previously logged into.

- **User Name**
  
  Enter your user name.

- **Password**
  
  Enter the password for accessing AppShare.

  **NOTE:** If you select `Remember Password` to securely store your password, you do not have to enter your password in future AppShare sessions.

**Conference Password**

**NOTE:** After tapping **Connect**, you may be prompted to enter your conference password provided by the meeting host.
Join an active conference

There are two ways to join an active conference.

**Select from a list of active conferences**

Scroll down the list of active conferences, select the conference, and tap the Join button on the keyboard.

**Enter a word or name in the search area**

Enter a word or name in the search area, select the conference, and tap the Join button on the keyboard.

NOTE: If you are unable to locate the conference you want to join, tap the refresh button in the upper right corner of the window.
Guest user window

**iPad view**

Server

Enter the server name, for example, `appshare.companyname.com`. Or, you can choose one of the servers you have previously logged into.

User Name

Enter your user name. For example, you can enter your name.

NOTE: This name displays in the Participant List and is used by the host to identify you.

Conference Code

Enter the conference code provided by the meeting host. This allows you to connect directly to the conference.

NOTE: After tapping `Connect`, you are prompted to enter your conference password provided by the meeting host.

**iPod/iPhone view**
Departing the meeting

A notice appears when the meeting host departs.

**Registered user departure**

When the meeting host departs, you can either display a list of existing conferences or exit from the AppShare application.

**Guest user departure**

When the meeting host departs, you can either return to the main AppShare window or exit from the AppShare application.
Context icons

- **Leave Conference**
  Exits the conference
  Exits participation in the current conference and returns you to select another conference for registered users and to enter a conference ID for guest users.

- **Participants**
  Participants button
  Displays the Participants List that shows: Host, Participants and Exited Participants.

- **Camera**
  Camera button
  Saves a picture of your screen to the Photo Album for future reference.

- **Information**
  Information button
  Links to the Help and Support Website.
  Displays the AppShare version number and copyright information.

**NOTE:** Pressing the iOS device’s Home button puts AppShare in the background, allowing you to multitask. Reopening AppShare reconnects to the same conference where you left off.
Zoom in and out

You can double-tap or pinch to zoom in on part of the shared screen to see smaller text. While zoomed in, you can tap and drag to pan to see other portions of the window. Then, you can double-tap to zoom out.

NOTE: This icon is displayed on the iOS device when the application is successfully installed.
